Rewrite Aims

To make Pamwin

- Faster
- More reliable
- Easier to use
- Easier to deploy
- Easier to maintain
- Hold fewer redundant features

Your challenges

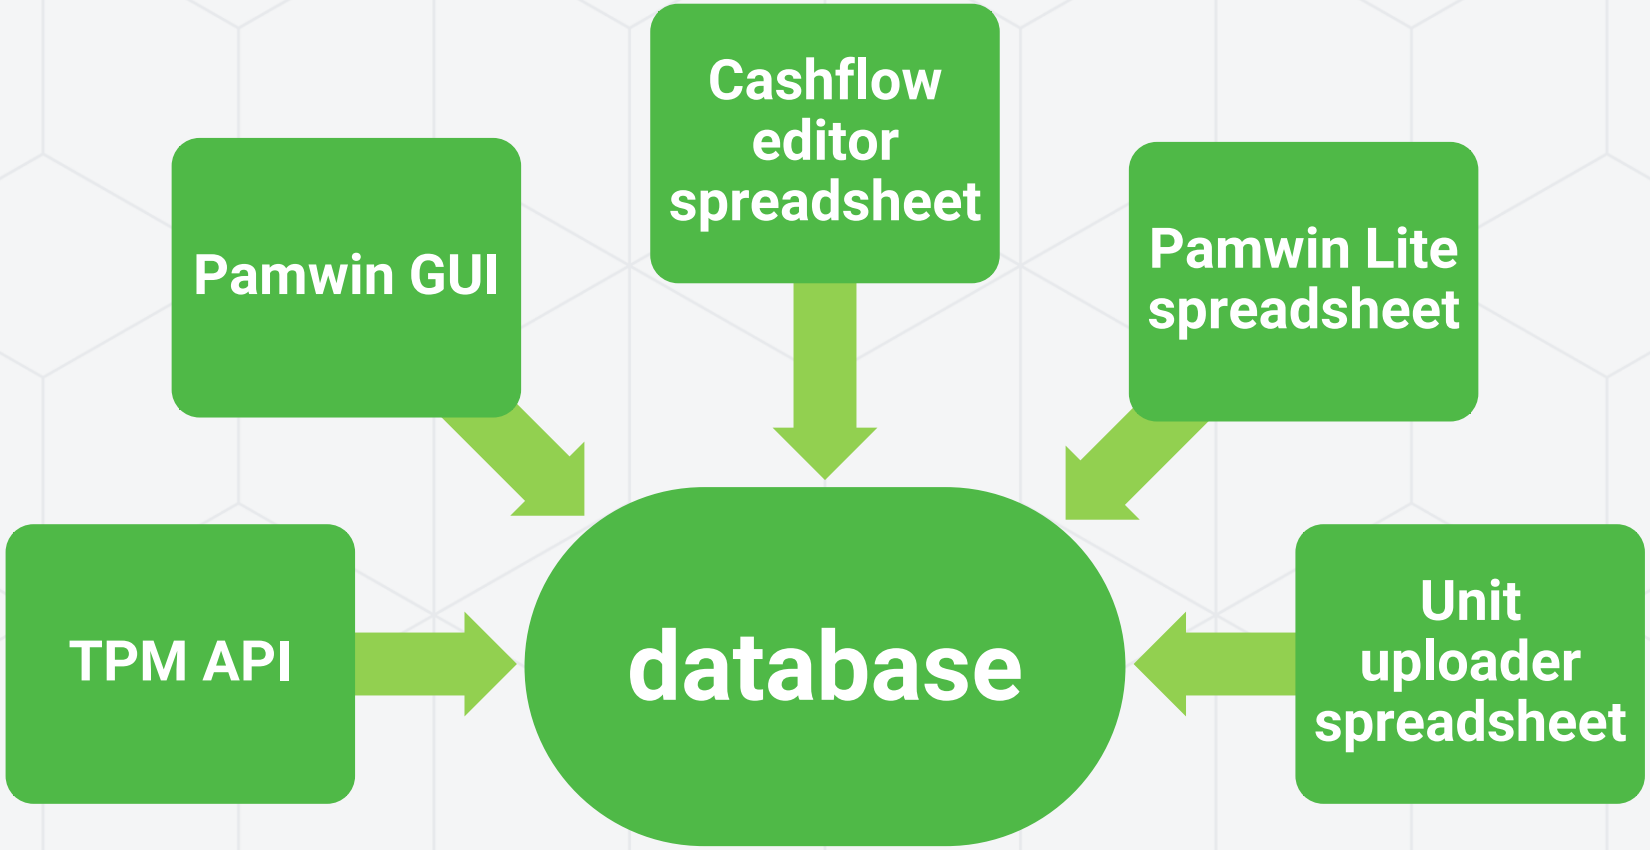
The rewrite conundrum – modifying a moving car

- Most clients use most features
- Cannot upgrade until all features covered
- Lots of tools in daily use
- When to change current system or ask clients to wait?

Your challenges expertly solved in partnership

The current system



Your challenges expertly solved in partnership

The previous vNext approach

Platform/Tech

- Choose the tech
- Create new database

Appraisal

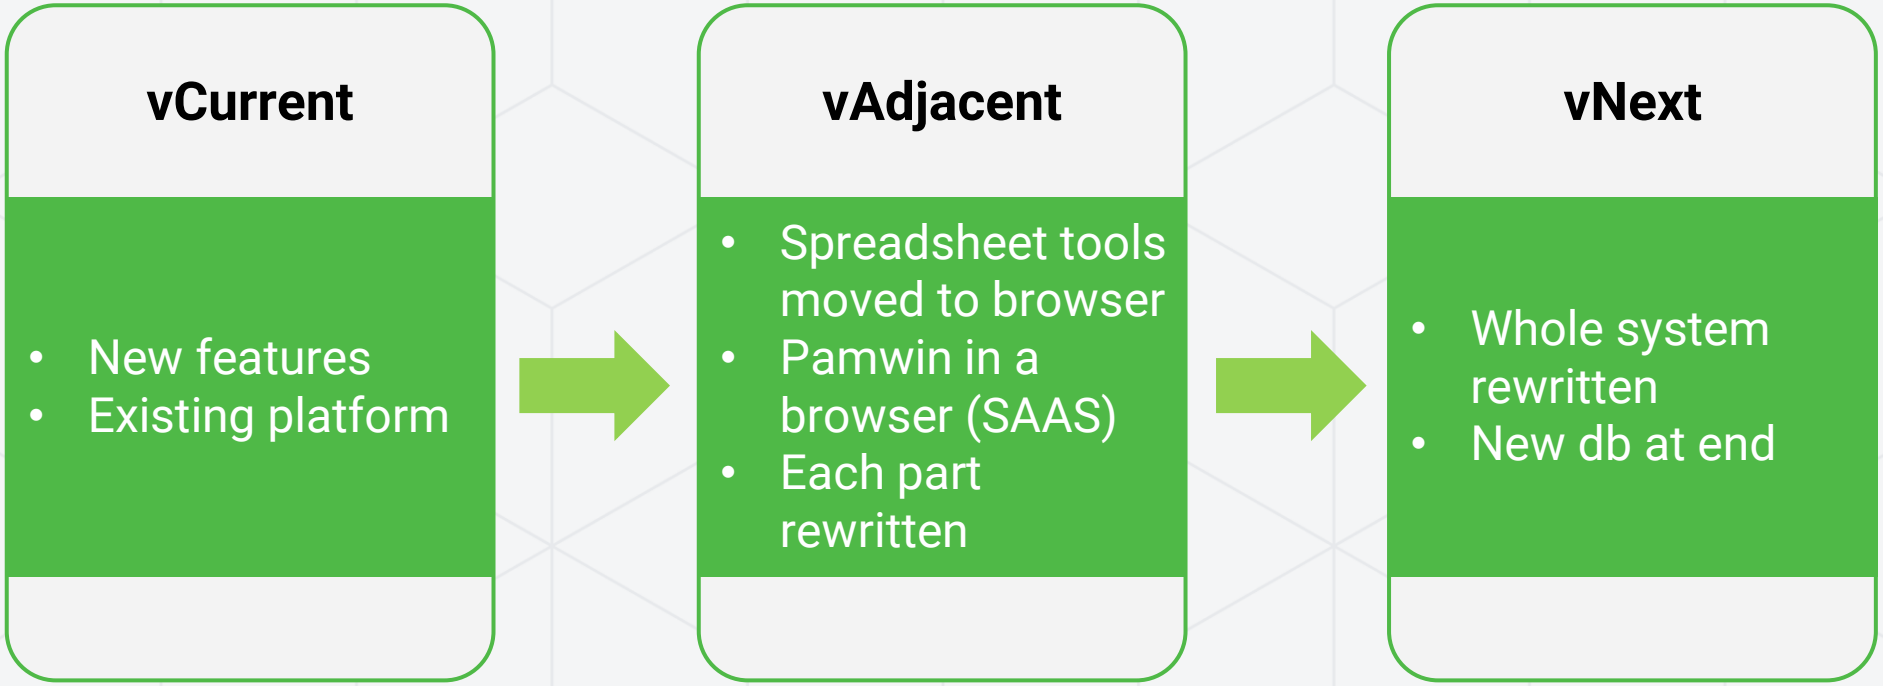
- Create appraisal tool in browser
- Based on Lite

Other Features

- Reporting
- Project management

Your challenges expertly solved in partnership

Now that’s what I call rewrite…



Your challenges expertly solved in partnership

The vAdjacent approach – new stuff

Platform/Tech

- Shortlist multiple tech solutions

Build tools in new tech

- Try cash flow in one tech
- Unit uploader in another
- Pamwin lite in a third?

Shift core system at the end

- Which tech is best?
- Use that one

Your challenges expertly solved in partnership

The existing system (vCurrent)

Reopen change requests

- Get the current system right

Create specification for vNext

- Separate feature addition from new architecture – less risky

Sort out deployment

- SAAS

Your challenges expertly solved in partnership

vCurrent / vAdjacent grow together

vAdjacent

- Use new tools without upgrading main Pamwin
- Shift to SAAS without upgrading

vCurrent

- Upgrade Pamwin for new features
- Don’t use new tools, or SAAS

Do both

- Use new tools as they are released
- Upgrade Pamwin for new features
- Move to SAAS

Your challenges expertly solved in partnership

New features now

Scenario testing (vA)

- Automatic costs up/sales down / tenure shift – time saver

Forecasting rules

- Stop cash flow from reforecasting between monthly posting
- One payment in a month
- Stop the PM confusion

Your challenges expertly solved in partnership

New features 2025

Cashflow editor in a browser (vA)

- Update from anywhere

On costs at Project level

- One entry for on costs

Unit acquisition profiling

- Link acquisitions to handover dates

Flexible cost categories

- More categories on Appraisal screen

Unit uploader in a browser (vA)

- Update from anywhere
